Answer Key

Use the three numbers on each tree. Write four facts.

$$\underline{4} + \underline{5} = \underline{9}$$

$$\underline{5} + \underline{4} = \underline{9}$$

$$\underline{9} - \underline{4} = \underline{5}$$

$$\underline{9} - \underline{5} = \underline{4}$$

$$\underline{3} + \underline{8} = \underline{11}$$

$$\underline{8} + \underline{3} = \underline{11}$$

$$\underline{11} - \underline{3} = \underline{8}$$

$$\underline{11} - \underline{8} = \underline{3}$$

$$\underline{6} + \underline{7} = \underline{13}$$

$$\underline{7} + \underline{6} = \underline{13}$$

$$\underline{13} - \underline{6} = \underline{7}$$

$$\underline{13} - \underline{7} = \underline{6}$$

$$\underline{5} + \underline{9} = \underline{14}$$

$$\underline{9} + \underline{5} = \underline{14}$$

$$\underline{14} - \underline{5} = \underline{9}$$

$$\underline{14} - \underline{9} = \underline{5}$$

$$\underline{4} + \underline{9} = \underline{13}$$

$$\underline{9} + \underline{4} = \underline{13}$$

$$\underline{13} - \underline{4} = \underline{9}$$

$$\underline{13} - \underline{9} = \underline{4}$$

$$\underline{7} + \underline{8} = \underline{15}$$

$$\underline{8} + \underline{7} = \underline{15}$$

$$\underline{15} - \underline{7} = \underline{8}$$

$$\underline{15} - \underline{8} = \underline{7}$$
