Answer Key

Use the three numbers on each slice. Write four facts.

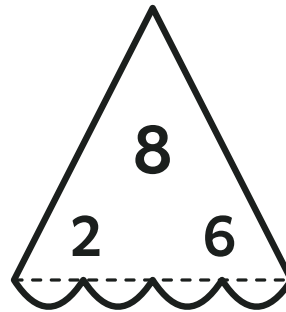

$$\underline{3} + \underline{4} = \underline{7}$$

$$\underline{4} + \underline{3} = \underline{7}$$

$$\underline{7} - \underline{3} = \underline{4}$$

$$\underline{7} - \underline{4} = \underline{3}$$

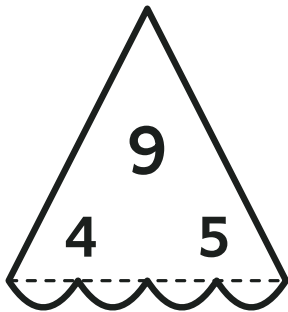

$$\underline{2} + \underline{6} = \underline{8}$$

$$\underline{6} + \underline{2} = \underline{8}$$

$$\underline{8} - \underline{2} = \underline{6}$$

$$\underline{8} - \underline{6} = \underline{2}$$

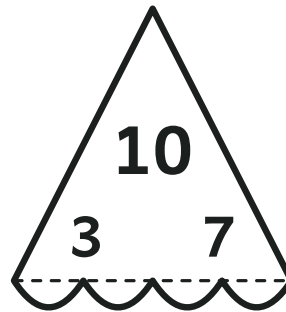

$$\underline{4} + \underline{5} = \underline{9}$$

$$\underline{5} + \underline{4} = \underline{9}$$

$$\underline{9} - \underline{4} = \underline{5}$$

$$\underline{9} - \underline{5} = \underline{4}$$

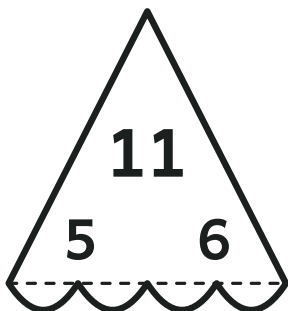

$$\underline{3} + \underline{7} = \underline{10}$$

$$\underline{7} + \underline{3} = \underline{10}$$

$$\underline{10} - \underline{3} = \underline{7}$$

$$\underline{10} - \underline{7} = \underline{3}$$

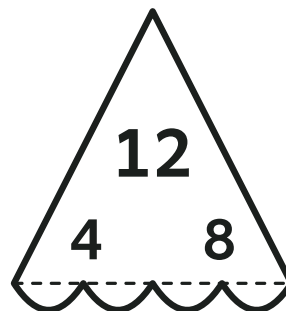

$$\underline{5} + \underline{6} = \underline{11}$$

$$\underline{6} + \underline{5} = \underline{11}$$

$$\underline{11} - \underline{5} = \underline{6}$$

$$\underline{11} - \underline{6} = \underline{5}$$

$$\underline{4} + \underline{8} = \underline{12}$$

$$\underline{8} + \underline{4} = \underline{12}$$

$$\underline{12} - \underline{4} = \underline{8}$$

$$\underline{12} - \underline{8} = \underline{4}$$
