1. **Find the farming terraces, then the long stairway just beyond them. What is on each side of this line? Which side grew the food, and which side did people live and worship in?**

2. **Find the fountains. Where did their water come from, and which building got the water first? What does that tell you about who lived there?**

3. **Machu Picchu gets heavy rain. Use the readings: how did the layers inside the terraces keep the steep slope from sliding away?**

4. **Find the Temple of the Sun. Which god was the Sun to the Inca, and why did honoring him matter so much to the ruler who built this estate?**
