Area of Composite Figures Set A

Name: _____

Each figure is split into two rectangles for you.

Find the area of rectangle A and rectangle B. Add them to get the area of the whole figure.

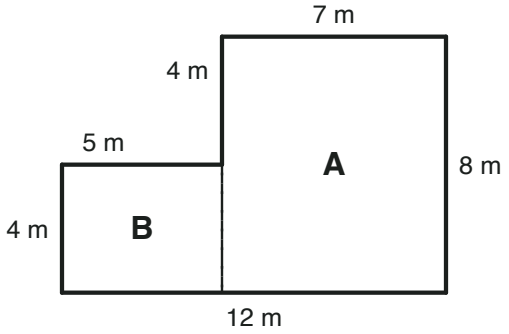

1.

A ____ × ____ = ____ **B** ____ × ____ = ____

Area = ____ + ____ = _____ sq cm

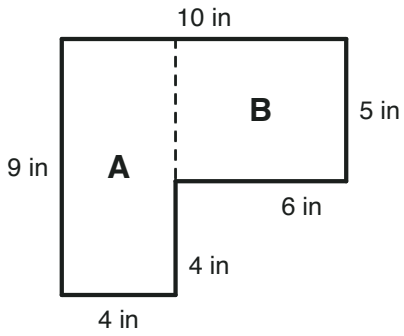

2.

A ____ × ____ = ____ **B** ____ × ____ = ____

Area = ____ + ____ = _____ sq m

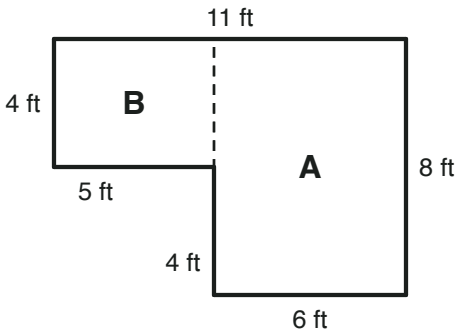

3.

A ____ × ____ = ____ **B** ____ × ____ = ____

Area = ____ + ____ = _____ sq in

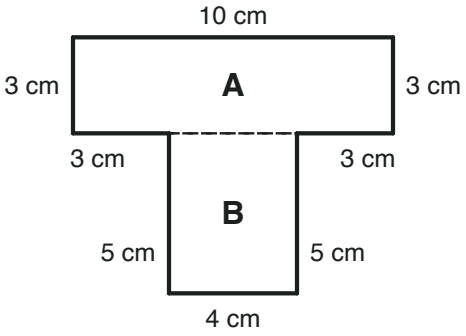

4.

A ____ × ____ = ____ **B** ____ × ____ = ____

Area = ____ + ____ = _____ sq ft

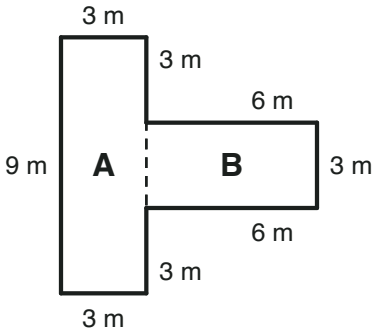

5.

A ____ × ____ = ____ **B** ____ × ____ = ____

Area = ____ + ____ = _____ sq cm

6.

A ____ × ____ = ____ **B** ____ × ____ = ____

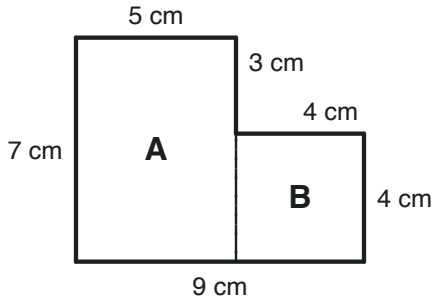

Area = ____ + ____ = _____ sq m

Area of Composite Figures Set A (Answer Key)

Each figure is split into two rectangles for you.

Find the area of rectangle A and rectangle B. Add them to get the area of the whole figure.

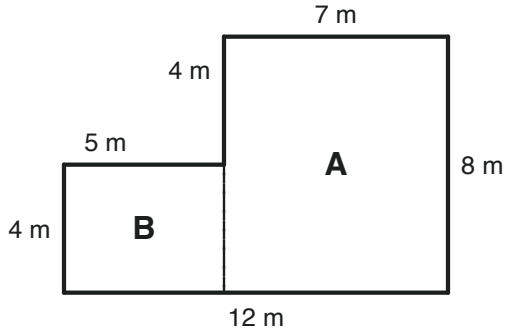

1.

A 5 × 7 = 35 B 4 × 4 = 16

Area = 35 + 16 = 51 sq cm

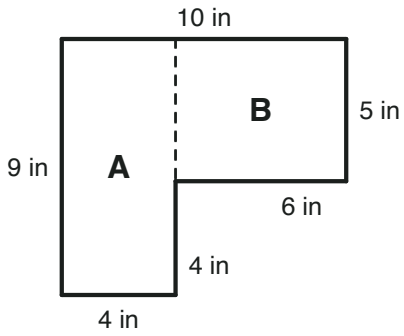

2.

A 7 × 8 = 56 B 5 × 4 = 20

Area = 56 + 20 = 76 sq m

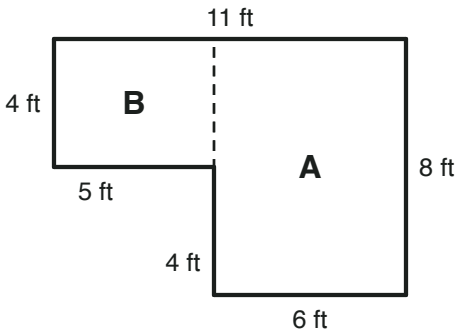

3.

A 4 × 9 = 36 B 6 × 5 = 30

Area = 36 + 30 = 66 sq in

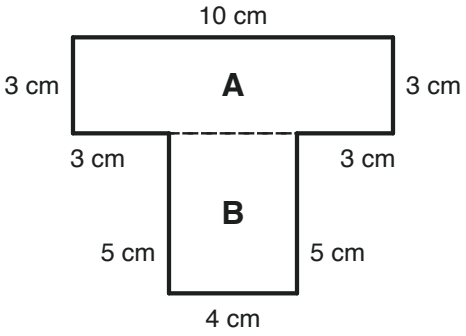

4.

A 6 × 8 = 48 B 5 × 4 = 20

Area = 48 + 20 = 68 sq ft

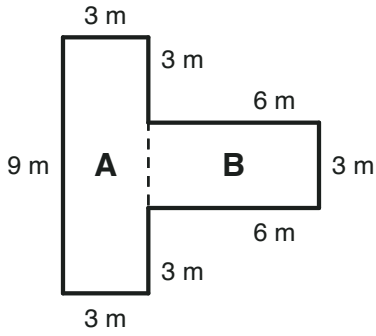

5.

A 10 × 3 = 30 B 4 × 5 = 20

Area = 30 + 20 = 50 sq cm

6.

A 3 × 9 = 27 B 6 × 3 = 18

Area = 27 + 18 = 45 sq m
