Elapsed Time: How It Works

Finding how much time has passed between a start time and an end time.

Elapsed time is how much time goes by

Use a number line and jump

45 min + 1 hr + 20 min = 2 hr 5 min

The three jumps

1. Jump to the next whole hour.
2. Jump by whole hours until one more would go past the end.
3. Jump the minutes that are left.

Watch out

There are 60 minutes in an hour, not 100. From 2:50 to 3:10 is 20 minutes, not 60. Jumping to the next hour first keeps you from subtracting the wrong way.

60 minutes = 1 hour
