Three Ways to Show Data

The same votes for a favorite fruit, shown as a tally chart, a picture graph and a bar graph.

1. Tally chart

One mark for each vote. Every fifth mark crosses the four before it, so you can count by 5s.

Apple	𝍸	5
Banana	𝍷	3
Orange	𝍸	4

2. Picture graph

One picture for each vote. The key tells you how many each picture stands for.

Apple	🍎 🍎 🍎 🍎 🍎
Banana	🍌 🍌 🍌
Orange	🍊 🍊 🍊 🍊

🍎 = 1 vote

3. Bar graph

The top of each bar lines up with a number on the scale at the side.
