Build a Clock

Cut out, join with a paper fastener, and turn the hands to show any time.

○ **HOUR (short)**

○ **MINUTE (long)**

Color the short hand one color and the long hand another.

1. Cut on the dashed lines: the clock and the two hands. Glue the clock to card to make it stronger.
2. Ask a grown-up to push a paper fastener through the dots on both hands and the clock.
3. Turn the hands to show a time. The short hand points to the hour, the long hand to the minutes.
