

**PUT THE STEPS IN ORDER**

Without looking back at the steps page, write 1 to 7 in the boxes to show the order of the steps.

1. Why must the drying step with natron come before the wrapping step?

2. Which organ was left inside the body? Using the reading, explain why it mattered in the afterlife.

3. About how many of the 70 days were spent drying the body in natron? Is that more or less than half of the time?
