

**PUT THE STEPS IN ORDER**

Without looking back at the steps page, write 1 to 6 in the boxes to show the order of the steps.

1. Why did builders have to find a spring that was higher than the city?

2. Why does the settling tank come before the distribution tank?

3. Most Romans did not have water piped to their homes. Where did they get their water? Use step 6 and the picture of Pompeii.
