States of Matter Practice

Name _____

# Solid, Liquid or Gas?

Read each clue. Circle the state of matter it tells about.

1. A rock keeps its shape when you move it from the floor to a shelf.
   Solid Liquid Gas

2. Juice takes the shape of whatever cup you pour it into.
   Solid Liquid Gas

3. The air inside a balloon spreads out to fill the whole balloon.
   Solid Liquid Gas

4. Honey pours slowly, but it still fills the bottom of the jar.
   Solid Liquid Gas

5. Water vapor rises from a pot of hot soup. You can't see it, and it spreads through the kitchen.
   Solid Liquid Gas

6. Sand can be poured, but each tiny grain keeps its own shape.
   Solid Liquid Gas

7. Milk splashes and flows, but a cup of it is still one cup in a bowl.
   Solid Liquid Gas

8. An ice cube sitting in the freezer.
   Solid Liquid Gas

States of Matter Practice

# Solid, Liquid or Gas? Answer Key

Answers are in green.

1. A rock keeps its shape when you move it from the floor to a shelf.

**Solid** Liquid Gas

2. Juice takes the shape of whatever cup you pour it into.

Solid **Liquid** Gas

3. The air inside a balloon spreads out to fill the whole balloon.

Solid Liquid **Gas**

4. Honey pours slowly, but it still fills the bottom of the jar.

Solid **Liquid** Gas

5. Water vapor rises from a pot of hot soup. You can't see it, and it spreads through the kitchen.

Solid Liquid **Gas**

6. Sand can be poured, but each tiny grain keeps its own shape.

**Solid** Liquid Gas

7. Milk splashes and flows, but a cup of it is still one cup in a bowl.

Solid **Liquid** Gas

8. An ice cube sitting in the freezer.

**Solid** Liquid Gas
